June storms cause more than \$42.2 million in damage

Topeka, Kan. – The Kansas Insurance Department, today, announced that destructive weather in the month of June caused more than \$42.2 million in damage. These estimates are based on a reported 5,470 insurance claims in 101 Kansas counties.

“We continue to see that the best defense against the active Kansas weather is proactive planning,” Insurance Commissioner Vicki Schmidt said. “Insured Kansans are reducing the financial impact of damaging weather by filing claims on their insurance policies.”

The estimates for June 2021 property loss payments more than doubled June 2020’s property loss payments of \$20.5 million. The June 2020 estimates were based on 5,120 insurance claims. So far in 2021, storm losses have caused more than \$141.3 million in reported damage.

Estimated storm loss data consists of windstorm, tornado, and hail damage or other weather-related claim losses for insured real and personal property in Kansas reported for each calendar year and monthly during the calendar year.

The Department collects this data for the general public and other interested parties. For historical storm loss data and guides on how to prepare for storms and finding the right insurance coverage, please visit our website at insurance.kansas.gov.
